Location: Kenya | Open to Remote, Hybrid and On-site Opportunities Worldwide

Professional Summary

Results-driven Software Engineering graduate from Zetech University with a strong background in Artificial Intelligence and Machine Learning. Experienced in developing intelligent applications, scalable software systems, AI-powered customer engagement solutions, and data-driven platforms. Adept at software architecture, problem-solving, and delivering innovative solutions in multicultural and remote environments.

Core Competencies

- Artificial Intelligence & Machine Learning
- AI Model Training & Evaluation
- Data Annotation & Quality Assurance
- Natural Language Processing (NLP)
- Full-Stack Software Development
- Web & Mobile Application Development
- Database Design & Management
- Prompt Engineering
- Agile & SDLC Methodologies
- Research & Documentation
- Analytical Thinking
- Problem Solving

Technical Skills

Programming: Python, Java, JavaScript, Dart, SQL, HTML, CSS

AI & Data: Pandas, NumPy, Scikit-learn, Jupyter Notebook, Machine Learning, Prompt Engineering

Frameworks & Tools: Flutter, Git, Android Studio, Visual Studio Code, Jupyter, Microsoft Office, Google Workspace

Databases: MySQL, PostgreSQL, SQLite

Operating Systems: Windows, Linux

Professional Experience

AI Data Annotation & Model Evaluation Specialist (Freelance) | 2023 – Present

- Annotated, classified, and validated large datasets for AI and machine learning projects.
- Evaluated AI-generated outputs and provided actionable feedback to improve model performance.
- Maintained high quality assurance standards in remote work environments.

Software Developer & Technical Consultant | 2022 – Present

- Designed and developed management systems, business applications, and AI-powered digital solutions.
- Integrated AI customer care systems and intelligent order recommendation features into business websites.
- Collaborated with clients to deliver scalable and efficient software products.

Content Moderation & Digital Operations Associate | 2022 – Present

- Reviewed and moderated digital content while ensuring adherence to platform policies and operational standards.

Selected Projects

Global Resilience and Innovations Platform

- Developed a collaborative platform focused on innovation, resilience, and global engagement initiatives.

Biz App

- Built a business management application supporting operations, analytics, and customer engagement.

MatDash

- Developed a dashboard platform for transport and operational analytics.

AI Cross Interconnection System

- Engineered an intelligent cross-platform AI interoperability system.

Management Systems & Brand Websites

- Built several management systems and modern brand websites featuring AI customer care and order suggestion capabilities.

Education

Bachelor of Science in Software Engineering
Zetech University, Kenya

Kenya Certificate of Secondary Education (KCSE)
Grade: B+

Kenya Certificate of Primary Education (KCPE)
Score: 385/500

Languages

- English – Fluent
- Swahili – Fluent
